- Wide band coverage
- VX-354 Four key or VX-351 no key versions
- Long battery life
- Extra signaling built in
- Option connector for encryption or MDC
- Stun Kill and Revive (option)

FEATURES

Two feature levels to choose from

The VX-350 Series portables will be available in two levels:

VX-351 has no display and only side keys.

VX-354 will have an 8-character Alphanumeric display and four programmable keys on the front.

Both versions will have 16 channels and 5 watts of power.

Long Battery Life

The VX-350 portable has a battery life of over 11 hours on the standard 1800 mAh battery. This is with battery saver turned off!

With the optional 2,000 mAh battery and battery saver on, the battery life extends to over 15 hours!

Wide Band Coverage

The VX-350 will be available in three band ranges:

VHF 134 MHz - 174 MHz

UHF 400 MHz - 470 MHz, 450 MHz - 512 MHz

Stun, Kill and Revive

Have you had a need to remotely disable a portable? Maybe you need to disable a lost or stolen radio. You can also Revive the radio over the air.

Emergency Button Standard

The VX-350 comes with an emergency function built in. This Emergency function, when activated, will switch to a designated channel, send an emergency unit ID and transmit with a live microphone.

Dual 2-Tone decoder

Dual 2-tone decode is built in as well as 2-tone encode.

Option Boards

The VX-350 has an option port to accept the following optional boards:

Simple inversion or rolling code encryption

DTMF paging decoder

MDC1200 or GE-Star ANI encoder
